

Aloe Fleur de Jouvence

Description and Purpose

The Aloe Fleur de Jouvence set is a collection of six wonderful products - each designed especially to play its part in a complete facial skincare regimen. Bringing together the benefits of traditional wisdom and the scientific knowledge of modern dermatology, Forever has spared no expense in researching and developing its excellent products. Each one comes in a timelessly-elegant container, marked with the International Aloe Science Council Seal of Approval (except the Facial Mask Powder) and gathered into a classically-designed presentation case, complete with mirror, a mixing spatula and application brush.

Each component is available separately for replenishment but only through the synergistic use of all elements can all the benefits be enjoyed.

At a glance...

- Cleanse twice daily with Exfoliating Cleanser
- Tone and freshen twice daily with Rehydrating Toner
- Give yourself an exhilarating aloe facial 2-3 times a week using Facial Contour Mask Powder and Aloe Activator
- Suitable for all ages and skin types

Description and Purpose

Each Aloe Fleur de Jouvence preparation has been developed with great care and attention to the everyday needs of your skin. We start with pure aloe vera gel, carefully stabilised and then we combine it with nature's own unique cellular substances, hydrolysed elastin and collagen, together with exceptional moisturisers, emulsifiers and humectants. This creates a unique skincare range that helps counteract the effects of time, weather and the environment. The preventative and restorative Aloe Fleur de Jouvence range provides a daily skincare regime to help promote the naturally-occurring attributes of youth, vigour, freshness and radiance within the skin.

Note: Although Aloe Fleur de Jouvence products comprise the best quality hypo-allergenic ingredients, as with any new product it is always wise to patch test on a small area of skin.
