

# Cheddar Natural Spring Water

## Description and Purpose

Forever's Water is crystal clear, with a neutral pH and a refreshing natural taste. The neutral pH of Forever's Water is also an ideal complement to both the function of the epithelial cells lining the digestive system and the forming of skin. It is sourced deep in the caves under the Mendip Hills, having been naturally filtered through Soil Association certified organic land and enriched by the rocks through which it travels. No chemicals or fertilisers are used.

Your body requires the intake of minerals in order to remain healthy. Forever's Water is a source of natural minerals in colloidal solution for increased absorption. It contains one of the highest mineral contents of all UK waters at 403mg/l.

### At a glance...

- Neutral pH - benefits the digestive system
- Contains many essential minerals
- Water is an effective remover of toxins from the body
- Naturally filtered through organic land
